R-410A POOL HEATERS

WaterFurnace®
Smarter from the Ground Up™

ENVISION™ SERIES

POOL HEATER FEATURES

SUPERIOR QUALITY

Every Envision Series pool heater must pass strict computer controlled run test and quality standards during manufacturing. Pool heat pumps are designed to last nearly twice as long as traditional gas pool heaters. Premium components and state of the art design are a hallmark of WaterFurnace International. With more than 20 years in the design and manufacture of the highest quality geothermal systems on the market, legendary WaterFurnace quality is now available to heat your pool without an earth loop. Every unit is backed by a 1 year limited warranty.

ENVIRONMENTALLY FRIENDLY

The Envision Series pool heater uses non-ozone depleting and low global warming potential R410A refrigerant. No combustion byproducts are produced by the advanced refrigerant circuit design, utilizing clean and efficient electricity. Higher efficiency also means less electricity is required to condition your pool.

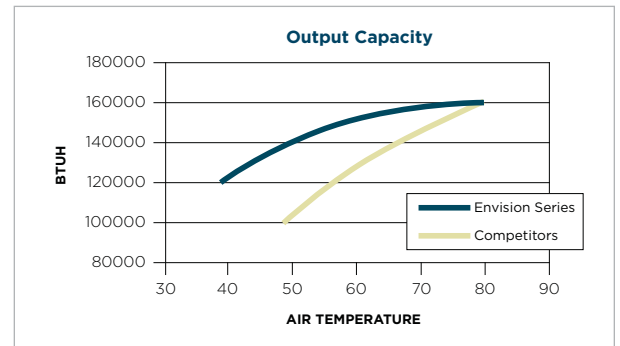

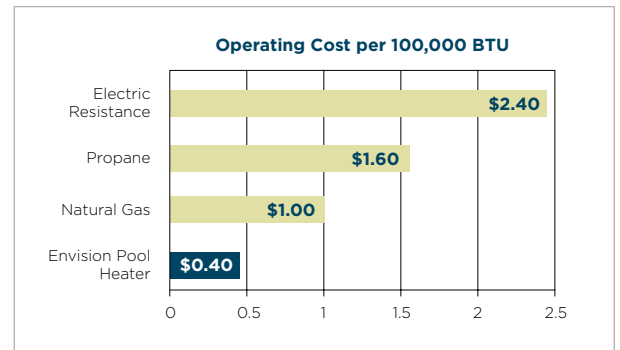

STATE OF THE ART DIGITAL CONTROLS TECHNOLOGY

Simple, precise and reliable. Our digital control is easy to use and maintain. The "Set it and forget it!" design offers one touch programming.

UNMATCHED PERFORMANCE AND OPERATING COSTS

Advanced design and premium components achieve a 25% increase in operating capacity over other leading heat pumps—saving you money. Operating costs are 60% less than natural gas!
